Hudson PEP fifth graders to participate in Mobile Offshore Learning Unit Pilot Program

About 90 Hudson PEP Elementary School students on Thursday will spend two hours rotating through Mobile Offshore Learning Units consisting of six self-contained components with curriculum-based hands-on learning activities about offshore energy topics.

The MOLUs are a \$1.2 million traveling education exhibit about energy concepts geared for fifth grade students developed by the Offshore Energy Center and sponsored by Devon Energy, Dominion Exploration & Production, ExxonMobil, Halliburton, Marathon Oil and Schlumberger. Upon arrival at the school, the units will be wheeled from the trailer and set up in the Hudson PEP gymnasium.

Photo and interview opportunities will begin about 9 a.m. The program is scheduled to run for half the day. If you would like to schedule coverage, please call Adam J. Holland at (903) 381-2236 or email aholland@lisd.org.
